

Don't compromise  
on good service

## IT Solutions

### APC NetDespatch Online Booking

APC NetDespatch is a web based programme available to all APC Demon Logistics customers. APC NetDespatch offers multiple advantages to the sender:

- All UK deliveries and collections booked online,
- Paper work greatly reduced as consignments are stored on the NetDespatch database,
  - Consignments may be viewed or tracked online,
    - Tracking summary provides daily, weekly or monthly POD reports,
      - PODs emailed directly to the customer,
  - Continually updated postcode address finder improves address accuracy,
    - Learning address book speeds the booking process,
  - Customer databases may be uploaded to program to speed booking process,
  - Routing labels printed on site by stationary provided by APC eliminating the need to separately mark individual boxes.

### APC Implant

APC can also supply a self booking system to those customers who are not online. We supply and install the software on your PC and the driver collects your data on a USB disc.

### Integration Services

APC NetDespatch are able to build booking systems to tie directly with any high input operation potentially eliminating any manual booking. Each build is tailor made to the individual customer's specification saving you time and money.
